LOCAL CHALLENGE PROJECT 2020: Accelerating the SDGs

‘ONE HOME ONE TOILET’ - A DATA DRIVEN SANITATION MODEL
SHELTER ASSOCIATES, MAHARASHTRA, INDIA

WHAT ARE OUR GOALS?
SUSTAINABLE DEVELOPMENT GOALS

NEWWURBAN AGENDA

POVERTY ALLEVIATION

SANITATION IMPACT

INDIVIDUAL IMPACT

A Civil Society Organization (CSO) established in 1982 by architects and urban planners to improve the life conditions of urban poor in India. We work in slums and rural communities to provide basic needs and, thereby, improve the quality of life and sanitation. We believe that such an approach can lead to a better future for all.

A THREATENING PROBLEM

 According to ISRO, 75% of the urban dwellers in India do not have basic sanitation facilities such as toilets and sanitation. This leads to many health problems and also affects the daily lives of people. This leads to poor sanitation, which in turn results in a rise in disease and other environmental challenges.

A THREE STEP PROCESS

DATA MAPPING

COMMUNITY MOBILIZATION

DELIVERY OF TOILETS

AWARDS RECEIVED BY SHELTER ASSOCIATES FOR SANITATION

SDGs CONSIDERED:

PUBLIC PARTICIPATION AND CITIZEN ENGAGEMENT

COMMUNITY MOBILIZATION

ENGAGING L2Bs in rural towns to facilitate services

MAXIMISING OUTLOOK TO ALL GENDERS

PROJECT: CIVIL SOCIETY

STATUS: IN PROCESS

PGH:

SDG 6: Water and Sanitation

50% households with access to improved sanitation

1.62 lakh toilets constructed

0.65 lakh households connected

5,500 schools connect

90% feeling of safety and security for women and students

Statistical facts and figures based on the survey done by Shelter Associates in the villages of Taluka Thane, District Raigad, Maharashtra, India.

A MULTI-STAKEHOLDER APPROACH - PARTNERSHIPS FOR DEVELOPMENT

50% households have access to improved sanitation

11.62 lakh toilets constructed

0.85 lakh households connected

55,000 schools connect

95% feeling of safety and security for women and students

Statistical facts and figures based on the survey done by Shelter Associates in the villages of Taluka Thane, District Raigad, Maharashtra, India.

Key Project Takeaway

One of the key takeaways from this project is the importance of community engagement and participation in achieving sustainable development goals. The project demonstrates that by involving local communities from the outset, we can ensure that the solutions are tailored to their specific needs and are more likely to be accepted and sustained over time. Additionally, the project highlights the importance of involving multiple stakeholders, from governments and NGOs to local communities and businesses, to achieve meaningful and lasting change. In conclusion, this project provides valuable insights into how to effectively address complex sanitation challenges through community-driven approaches. The lessons learned from this project can be applied to similar initiatives around the world to accelerate progress towards achieving the SDGs and improving the lives of millions of people.
