LOCAL CHALLENGE PROJECT 2020: Accelerating the SDGs

PARTICIPATORY DESIGN AND PLANNING IN TUBIACANGA
RIO DE JANEIRO, BRAZIL

PROJECT OVERVIEW
THE NEIGHBORHOOD
Tubiacanga is a neighborhood located in the west zone of Rio de Janeiro, Brazil. The area was originally colonized by Italian immigrants from Tuscany and Liguria in the early 20th century. Over the years, the neighborhood has grown and diversified, becoming a vibrant and diverse community known for its colorful culture and welcoming atmosphere.

THE PROBLEM
Since 2010, the City Hall has been monitoring the situation in the neighborhood and prioritizing the need for a comprehensive urban intervention plan. The objective is to improve the quality of life for the residents, especially the younger generation.

The PROYECTO TUBIACANGA project was initiated in 2017, aiming to develop a comprehensive plan for the neighborhood's development.

THE RESISTANCE
Two decades of urban policies and projects left Tubiacanga in a vulnerable position. The neighborhood is characterized by its density and the lack of public spaces, which makes it difficult for the residents to feel a sense of community. The project seeks to address these issues by creating new public spaces and improving existing ones.

PROJECT: EDUCATION
STATUS: CONCLUDED

SDGs CONSIDERED
3, 4, 5, 10, 11, 12, 15, 16, 17

OUTCOMES
The project has led to improvements in the neighborhood, including new public spaces, improved infrastructure, and enhanced community engagement.

PROJECT TAKEWAYS
The outcomes have included the creation of new public spaces, improved infrastructure, and enhanced community engagement.

PROJECT IMPACTS
The project has contributed to the community by providing new public spaces and improving infrastructure, leading to enhanced community engagement.
